

DECEMBER 1 – 3, 2026
DURHAM, NORTH CAROLINA

This conference brings together scientists across the quickly growing field of microbiome engineering. The program integrates synthetic biology, systems biology, microbial ecology, and bioinformatics across a range of application spaces.

SESSION TOPICS

- Tools, Standards, and Modeling
- Therapeutics and Industrial Applications
- Environmental Microbiome Engineering
- Engineering Microbes and Microbial Communities
- AI/ML/Automation to Accelerate Microbiome Engineering

CONFERENCE GRANTS AVAILABLE

We may receive funding to help sponsor some registrations for ICME 2026. Students, post-docs, and early-career professionals are encouraged to apply.

CONFERENCE CHAIRS

Nathan Crook
NCSU

Greg Medlock
Vedanta Biosciences

ORGANIZING COMMITTEE

Emma Chory
Duke University

Brian Klein
DSM-Firmenich

Allison Lopatkin
University of Rochester

Chris McChalicher
Seres Therapeutics

Lauren Stadler
Rice University

Lingchong You
Duke University
